Projects

FeedbackFusion– NEXT JS [live] (GitHub)

- Developed an anonymous feedback platform using Next.js, enabling users to receive feedback by sharing a unique link.
- Utilized ShadCN for a robust component library and NextAuth for secure user authentication and personalized feedback link management.
- Integrated OpenAI to suggest messages for users, enhancing the feedback process with AI-driven recommendations.
- Implemented a feature allowing users to toggle message reception, providing control over incoming anonymous messages and enhancing user experience with a user-friendly interface.

D-Learning – MERN [live] (GitHub)

D-Learning is a fully functional ed-tech platform that enables users to create, consume, and rate educational content. The platform is built using the MERN stack, which includes ReactJS, NodeJS, MongoDB, and ExpressJS.

D-Learning aims to provide:

- A seamless and interactive learning experience for students, making education more accessible and engaging.
- A platform for instructors to showcase their expertise and connect with learners across the globe.

Co-Curricular activities:

- Solved 500+ problems on leetcode and GFG.
- Participated in 36 hours long National level Hackathon (Kriyeta).

Training:

- CODEHELP:** Completed 4.5 month of intensive training on the MERN stack (MongoDB, Express.js, React.js, Node.js) at CodeHelp.
- UDEMY:** Full Stack Web Development [May 2021 – June 2021]

ACHIEVEMENTS:

- Campus Rank 7 on Geeks for **Geeks**.
- 3 stars on **leetcode**.
